

DOWSIL™ Crystal Clear Spacer

DOWSIL™ Crystal Clear Spacer is a fully cured, pre-formed insulating glass for glass doors (entrance doors, commercial refrigerator doors), interior applications and glass panels requiring full vision.

Developed to help meet the growing trend for full vision glazing, new DOWSIL™ Crystal Clear Spacer can be applied on opposite sides of glass to provide full vision. To apply, it offers both durability and an enhanced aesthetic appearance. As an example, the use of DOWSIL™ Crystal Clear Spacer can be advantageous when applied to commercial refrigerator doors where product presentation and visibility in a retail environment is highly desirable.

DOWSIL™ Crystal Clear Spacer should be applied following the use of DOWSIL™ R-40 Universal Cleaner and DOWSIL™ 1200 OS Primer which are recommended for glass surface preparation. Please refer to the DOWSIL™ Crystal Clear Spacer Application Guide for comprehensive instructions, material handling and quality
